

Magic Foaming Snowman Recipe

Ingredients

- 2 cups baking soda
- 1 tsp washing up liquid
- 2 tbsp salt
- Vinegar
- 8 tbsp water
- A squeeze bottle
- Waterproof accessories
- Small black beads/buttons for the snowman eyes
- A carrot shape cut out of orange foam for its nose
- A hat shape cut out of black foam
- 2 little twigs for the arms
- Tray

Method

1. In a bowl, put the baking soda and the salt. Mix them together.
2. Add the washing up liquid and mix into the dough thoroughly. The dough should look crumbly.
3. Next add the water.
4. If your dough will form a ball, you're all set. If it's still dry and crumbly, add 1 tablespoon of water at a time until you have a dough that is mouldable.
5. In a tray, make the dough into a snowman shape and decorate using the resources.
6. Using a squeeze bottle, squirt vinegar onto the snowman and watch as it slowly 'melts'.
7. In place of the snowman, will be a pile of icy cold frothy foam to play with.
8. Build the snowman back up and repeat the activity (once you've scooped his accessories out of the tray).
