Guidance from the local authority below regarding winter vomiting bugs

Diarrhoea and/or vomiting may be due to a variety of causes including germs, toxins, or non-infectious diseases. However, as a general principle, all cases of gastroenteritis should be regarded as potentially infection unless there is good evidence to suggest otherwise.

Children and adults with diarrhoea and/or vomiting should be excluded until 48 hrs after diarrhoea and/or vomiting symptoms have stopped, and they are well enough to return. If medication is prescribed, ensure that the full course is completed and there is no further diarrhoea and / or vomiting for 48 hrs after the course is completed.
